Skills

- **Languages**: Java, Python, C, C++, JavaScript, SQL, MongoDB
- **Web Development**: HTML, CSS, React JS, Node JS, Express JS
- **Libraries**: Pandas, NumPy, Scikit-learn, Matplotlib
- **Tools/Platforms**: Power BI, Git, Streamlit, Excel, Figma
- **Soft Skills**: Problem Solving, Team Collaboration, Time Management, Adaptability

Projects

- **AI Loan Repayment Planner |** December 2025
  - Developed an AI-powered loan repayment planner that analyzes user income, expenses, and credit profiles to generate optimized repayment strategies, enabling 40–60% faster loan payoff**.**
  - Implemented machine learning–based recommendation models to minimize interest burden, helping users achieve 20–30% average interest savings**,** with interactive visualizations to track progress and financial impact.
  - Built a complete end-to-end data-driven application using Python, Streamlit, NumPy, Pandas, Scikit-learn, and Matplotlib**,** significantly improving financial decision-making accuracy through insightful analytics.
    Tech: Python, Streamlit, Pandas, NumPy, Scikit-learn, Matplotlib

- **Vendor Performance Dashboard |** October 2025
  - Architected an end-to-end vendor analytics pipeline using SQL and Python**,** supported by interactive Power BI dashboards to monitor KPIs such as delivery time, quality, cost, and compliance.
  - Streamlined vendor performance analysis by reducing monthly reporting time by 40% and identifying the top 10% underperforming vendors**,** enabling data-driven reviews and targeted contract negotiations.
  - Automated ETL workflows and scheduled reporting**,** significantly improving decision-making speed while reducing manual errors by 30% through consistent and reliable data processing.
    Tech: SQL, Python, Power BI

- **Appointy | MERN Stack Appointment Booking System |** August 2025
  - Development a full-stack appointment booking system enabling users to register, login, book appointments, and make secure online payments.
  - Designed and implemented an end-to-end appointment booking application featuring secure user authentication, dynamic slot scheduling, and seamless online payment processing using integrated third-party APIs.
  - Architected a MERN-based appointment reservation system with RESTful APIs, JWT-based authentication, role-based access control, and secure payment integration to ensure reliable booking and transaction handling.
    Tech: MongoDB, Express.js, React.js, Node.js, Razorpay, JWT

Training

- **Cipher Schools (EdTech Company) |** June 2025 - July 2025
  - Completed Data Structures and Algorithms training using Java, earning a Satisfactory grade while strengthening programming, problem-solving, and algorithm optimization skills through hands-on implementation and complexity analysis.

Certificates

- Data Analytics Job Simulation - Deloitte | June 2025
- Cloud Computing – NPTEL (IIT Kharagpur) | April 2025
- Carrier Essentials in Generative AI - Microsoft and LinkedIn | June 2024
- Responsive Web Design - FreeCodeCamp | November 2023

Extra Curricular Activities

- **Adobe India Hackathon |** July 2025
  Participated in Round 1: Online MCQ Assessment + Coding.
- **Flipkart Grid 6.0 |** August 2024
  Participated in Level 1: Commerce & Tech Quiz.
- **Cyber Security vs Ethical Hacking |** November 2023
  Completed hands-on cybersecurity workshop by SECUNES.

Education

- **Lovely Professional University** **Punjab, India**
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.29*** *August 2023 - Present*
- **M.S. Memorial Academy** **Patna, Bihar**
  Intermediate; ***Percentage: 65%*** *April 2021 - March 2022*
- **New Patliputra Central School** **Patna, Bihar**
  Matriculation; ***Percentage: 75.6%*** *April 2019 - March 2020*
